■ DIMENSIONS

|                                    |                |                       |
|------------------------------------|----------------|-----------------------|
| Fiber Length (m)                   |                | 2                     |
| Ambient temperature                |                | -30~+70°C             |
| Fiber Material                     | External cover | Polyethylene          |
|                                    | Inside fiber   | Plastic               |
| Fiber Diameter                     | Cable          | 2.2                   |
|                                    | Inside fiber   | 1.0                   |
| Minimum bending radius             |                | 30R                   |
| Standard detection object diameter |                | ø2.0(fine adjustable) |
