

Bodine Gears

Bodine Electric pioneered the first concept of fractional horsepower motors with integral gear reducers in the 1920's. Since that time, we have carefully guarded our reputation for producing the quietest, smoothest, longest lasting gear components and products in the industry.

Bodine is now offering its gear manufacturing services to customers who demand high quality gear components, delivered on-time, at a fair price. With our combination of gear manufacturing expertise, including tooling design & fabrication capabilities, we're a value-added supplier, eager to work with you to solve your gear component needs.

Now you can incorporate our high standards of quality and reliability into products that require fine and medium pitched gears.

**CHALLENGE US! We're our most demanding customer. 1-877-4GEARS9

Available Products

- Fine Pitched Gears
- Spur Gears
- Helical Gears
- Pinions and Shafts
- Cluster Gears and Assemblies
- Worms and Worm Gears
- Planetary Gears
- Skived Gears

Capabilities

- 8 NDP and finer
- Skiving
- Carbide Hobbing
- Analytical & Composite Inspection
- CNC Machining
- Grinding

Sample of gears currently manufactured by Bodine Gear Manufacturing:

- Bore Gears
- Assemblies
- Pinions
- Shafts
- Armatures
- Separable Worms
- Integral Worms
- Wormgears
- Splines
